Employment History

ETL Developer 2019 – Present

Bentley Systems • Huntsville, AL

- Created the Object Relational Database Tables with all the necessary Constraints.
- Performed Full load & Incremental load with several Dataflow tasks and Control Flow Tasks using SSIS.
- Involved in scheduling Teradata and UNIX objects to run the jobs on daily/weekly basis depending on business requirement.
- Implemented utility functions in JavaScript to make asynchronous calls using XMLHttpRequest.
- Worked with SQL Server Integration Services (SSIS) to ETL from OLTP tables.
- Created stored procedures and functions to support data storage and manipulation.

Software Development Engineer 2017 – 2019

Boeing • Huntsville, AL

- Implemented C and C++ to parse JTRS XML data in RTOS and Windows OS systems.
- Approved hardware component verifications of supplier.
- Participated in PAM/BAM test data analysis and disbursement.
- Created and integrated into XOS Linux switch driver kernel loadable modules.

Software Engineering Internship 2016 – 2017

Lockheed Martin • College Park, MD

- Integrate legacy MP&S software into a future program architecture simulation, missile tracking algorithm development and testing.
- Innovated stored procedures to process data up to 60 to 95% faster than the existing counterparts.
- Communicated with customers to identify and resolve software and hardware issues.
- Used HandlebarJS to render JSON data from Webservice using AJAX.

Education

Bachelor's Degree Computer Science 2013 – 2016

University of Maryland – College Park • College Park, MD
